MISCELLANEOUS STOCKS.

Thursday, September 17-p. m. Excessive dulness marked the course of stock trading to-day, despite the fact that prices were strong and advancing. Traders, who in the last two days depressed prices, changed their attiled to a general rally throughout the list. The its minimum rate of discount at the weekly large amount of gold would be engaged in Paris doubtless the determining factors for the change reduced transactions to small proportions, Sugar Refining, Burlington, St. Paul and Manhattan furnishing the bulk of the dealings. In the last which led to various rumors about an inside upward movement was due to manipulation. The advance was certainly not due to the company's present earnings. Although the St. Paul Company for the second week in September showed a loss in gross earnings of \$112,510, as compared with the same week a year ago, the stock gained nearly 2 per cent, while the rest of the Granger shares were up 14,024 per cent. Chicago Gas, Sugar Refining and Western Union made net gains of 262% per cent, and throughout the rest of the active list net final changes were generally at 1 per cent and above. Room traders who sold stocks yesterday figured as the chief buyers to-day, but there was little disposition to sell. Money was in fair demand, without material change in rates or in conditions, and sterling exchange was weaker with a good supply of cotton and grain bills. Gold to the amount of 50,000 was withdrawn from the Bank of England for shipment here and \$240,000 gold was deposited at the Sub-Treasury in exchange for legal-tender notes. The Bank of England's selling price for American gold engles is now 76s 7½d, while that of the Bank of France is a trifle lower and it is likely that the gold movement this way for the next week or so will be principally from Paris. To date the total known amount of gold arrived, on shipboard and engaged is \$36,385,000 and the Treasury's gold reserve stands at \$114,605,648.

Closing prices for a number of active stocks showed a loss in gross earnings of \$112,510, as serve stands at \$114,605,648.

The directors say: "The physical condition of clous and liberal expenditures on the roadbed for being made, and the rolling stock appertaining to the property has been kept in excellent condi-

nent of the Government debt, the report says: "In general terms, the Government directors desire to repeat the suggestions contained in their last report, with the additional suggestion that, if last report, with the additional suggestion that, it it be found impracticable to combine the fore-closures of the Union and Central Pacific in contemporaneous proceedings, which would result in the sale of both properties on the same occasion and render possible their purchase by a single interest, the separate lien of the United States upon the Union Pacific Railway property should be foreclosed and that property sold. In relation to this subject, the large interests which are represented in the committees charged with the reorganization of the property may, somewhat later in the year, assume a more definite attitude and define more clearly the part which they may be willing to take in reaching a satisfactory adjustment of the Government claim. It may, in that event, be necessary for the protection of the Government that prompt action be taken. In case the pending litigation should require some action or intervention on the part of the Government, or in case some proposition for a settlement and adjustment, on what may seem to the Government directors to be reasonable terms, should be made, we shall file a supplementary report with our recommendations. found impracticable to combine the foreid be made, we shall file a supplementary re-
